

IT and Software Management

MSC's team of professionals, comprised of CIO's, Engineers, and Technicians provide on-site and remote management services designed to optimize a client's current IT infrastructure with workflow.

MSC provides the following IT support:

- Conduct a detailed review to determine how IT technology can be improved to compliment the work flow of all departments.
- Ensure data stability and recovery.
- Capture and disperse data through custom reports and database applications.
- Collect and extract data from existing systems to be reformatted for financial institutions and lenders.
- Web and E-Commerce for improved sales.
- Service contracts to maintain hardware and provide server and desktop support.
- Help and support to set up and train IT departments for growing companies.

MSC's IT management service has resulted in improving our client's productivity and speed without sacrificing quality. It has also resulted in lower costs to maintain the best and most current IT infrastructure available.
